Meet the Professional Manufacturer of Agricultural Machinery & Tools- ALAT PERTANIAN!!!

ALAT PERTANIAN also known as *Farming Tools- Factory and Sales Center for Agricultural Machines and Tools* is a leading supplier of **Mesin Briket Arang Batok** (Shell Charcoal Briquette Machine). Here we sell and deal with Briquette Machine.

We offer best quality Shell Charcoal Briquette Machine at best prices. Charcoal Briquette Machine or **Mesin Briket Arang Batok** is primarily designed for broken up charcoal, charcoal dust, coconut shell charcoal, carbonized charcoal dust, coal slurry, coal powder, coke powder, coke and other loose materials, mostly in chemical business, suitable for wet powder ball pressing. That is, adding an appropriate proportion of water or other liquid adhesive to materials to press ball with low-pressure. Compared to common coal ball press machine, static pressure ball press machine power burning up will be comparatively small.

An additional tool in the process of machine made charcoal is charcoal powder Briquette machine. Also known as carbon powder extruder charcoal powder Briquette machine can be used to make charcoal briquette of oval, squire, and pillow shape with different molds from charcoal dust and charcoal powder. Our **Mesin Briket Arang Batok** has the advantages of high density, high strength that allows the machine widely used in several field. Did you know about charcoal briquette or Briket Arang? It is substitute fuels made from coconut shell or wood which have been powdered and mixed with bonding agent and then printed with assured shapes, usually in the form of boxes, cylinders, or facets.

As well, there is a big role of briquette machine in the construction manufacturing. Construction business has over the years developed with innovative technologies. Across many regions of the world, some countries and governments are intently calling on more and more companies and industries to use biomass fuel rather than fossil fuel. Incidentally, the former hammer out and implement consented regulations and decrees to support the use of biomass energy equipment such as **Mesin Briket Arang Batok** or briquettes making machine.

With the advance of technology we have been successful to design the **Mesin Briket Arang Batok** for several

clienteles, which construct a new actuality of the coal briquette device. It recognizes the recycle of resources and turns best out of waste, which not only creates good financial and communal profit, but also achieves the national policy of sustainable development supplies, so there are wide outlooks for the expansion of coal briquetting machine.

Also the price of our coal briquette machine is favorable, and we have simple coal briquette press production process, which is accessible to clientele for the on-site testing.

For further details please visit our website.

1. Mesin Cruser / Penepung Arang Batok Kelapa

Spesifikasi :

Bahan Body : Plat Esser Mild steell

Bahan Rangka : Besi UNP

Dimensi Tabung :

Panjang (length) : 600 mm

Lebar (Width) : 500 mm

Tinggi (hight) : 600 mm

Dimensi Keseluruhan :

Panjang (length) : 1300 mm

Lebar (Width) : 800 mm

Tinggi (hight) : 1500 mm

Kapasitas (Capacity) : 300 Kg/Jam

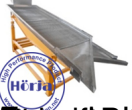

Penggerak (Enginee) : Diesel 24 Hp

BBM : Solar

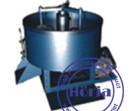

2. Mesin Cutting Mill Arang Batok Kelapa

Mesin Pengalir Tepung Arang Batok Kelapa

Mesin Pengalir Batok Kelapa ke dalam Angin Bara sebelum dicetak kemesin cetak.

Mesin Pengalir sampai rata tepung batubara dgn lem 2,5 % sampai kelembaban tertentu.

Mesin Pengalir Extruder - Listrik

Mesin Pengalir batok Extruder satu moulding)

Mesin Pengalir Batok Extruder

Mesin Pengalir Lem Arang

Mesin Pengalir Lem Arang ke dalam Angin Bara sebelum dicetak kemesin cetak
